62 / 100 Speed

Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.css>
- <https://fonts.googleapis.com/css?family=Roboto>
- <http://downvid.co/css/custom.css>

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 151.8KiB (31% reduction).

- Compressing <http://downvid.co/img/a3.jpg> could save 88.6KiB (21% reduction).
- Compressing and resizing <http://downvid.co/downvid.png> could save 33.4KiB (90% reduction).
- Compressing and resizing <http://downvid.co/img/twitter.png> could save 11.6KiB (94% reduction).
- Compressing and resizing <http://downvid.co/img/gplus.png> could save 9.6KiB (91% reduction).
- Compressing and resizing <http://downvid.co/img/facebook.png> could save 8.7KiB (96% reduction).

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://downvid.co/css/custom.css> (expiration not specified)
- <http://downvid.co/downvid.png> (expiration not specified)
- <http://downvid.co/img/a3.jpg> (expiration not specified)
- <http://downvid.co/img/facebook.png> (expiration not specified)
- <http://downvid.co/img/gplus.png> (expiration not specified)
- <http://downvid.co/img/twitter.png> (expiration not specified)

Mobile

- <http://downvid.co/js/custom.js> (expiration not specified)
- <https://www.googletagmanager.com/gtag/js?id=UA-109997982-1> (15 minutes)
- <http://pagead2.googlesyndication.com/pagead/js/adsbygoogle.js> (60 minutes)
- <https://www.google-analytics.com/analytics.js> (2 hours)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 260B (19% reduction).

- Minifying <http://downvid.co/css/custom.css> could save 260B (19% reduction) after compression.

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 668B (25% reduction).

- Minifying <http://downvid.co/> could save 668B (25% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

Mobile

[Minify JavaScript](#) for the following resources to reduce their size by 317B (28% reduction).

- Minifying <http://downvid.co/js/custom.js> could save 317B (28% reduction) after compression.

Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

Enable compression

You have compression enabled. Learn more about [enabling compression](#).

Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

81 / 100 User Experience

Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Consider Fixing:

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 994 CSS pixels wide, but the viewport is only 980 CSS pixels wide. The following elements fall outside the viewport:

- The element `<div></div>` falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `Salesforce Inb...s. Get e-Book!` is close to 2 other tap targets final.
- The tap target `<div id="abgc" class="abgc"></div>` is close to 3 other tap targets final.
- The tap target `<div id="abgc" class="abgc"></div>` is close to 3 other tap targets final.
- The tap target `<input id="url" type="text" class="form-control">` is close to 1 other tap targets final.
- The tap target `<button id="videodownload" class="btn btn-block btn-color">Download</button>` is close to 1 other tap targets final.

Mobile

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Issue renders only 5 pixels tall (14 CSS pixels) final.
- Salesforce Inb...e Productivity renders only 5 pixels tall (13 CSS pixels) final.
- Salesforce Inb...s. Get e-Book! renders only 4 pixels tall (11 CSS pixels) final.
- salesforce.com/Inbox renders only 4 pixels tall (11 CSS pixels) final.
- OPEN renders only 4 pixels tall (11 CSS pixels) final.
- Download renders only 5 pixels tall (14 CSS pixels) final.
- ©2017 Downvid.co renders only 5 pixels tall (14 CSS pixels) final.
