Burning your pounds with Flat Belly Fix

★★★★★ (6 votes, average: 5.00 out of 5)

These days a great number of people are absolutely dissatisfied with the shape of their bodies. Some folks dream of having broader shoulders, sexier lips, lush hairs and so on. However, there's one universal thing that is common for all these people. That's the look of their belly. Very often it's awfully big and they would

Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 9 blocking script resources and 12 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.
