Should Fix:

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### Consider Fixing:

#### Reduce server response time

In our test, your server responded in 0.22 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

#### Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 3.9KiB (13% reduction).

## Consider Fixing:

### Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<span class="et_close_search_field">` is close to 1 other tap targets final.
- The tap target `<a href="#Erklärung%20Werbelink">*` and 2 others are close to other tap targets.
- The tap target `<a href="https://trocke...utzerklaerung/">Datenschutzerklärung` and 1 others are close to other tap targets.
